5'10" tall, about 70 Kgs. Moderate build

About:

Born in Jamnagar, Gujrat. Grew up in Mumbai. Liked playing outdoor games as a child, grew up as a science enthusiast and engineer. Picky in food and lifestyle choices. Outgoing person, with cheerful, down to earth attitude and passionate about tech. Recently completed master's from Rochester Institute of Technology. Working for Microsoft as a Software Engineer since past 2 years on Microsoft Teams.

My job has me busy during weekdays. I try to follow news, markets, science and technology during my free time in the week. On weekends I like meeting friends for dinner and casual hanging out, watching TV series and movies, playing video games, sometimes hiking, occasionally camping and travelling. Trying to live a fit and healthy lifestyle. Passionate about science, love listening to music; like Bollywood, metal, EDM and pop music genres. Potentially planning to move back to India after 10 years. Career focused in life. I consume Jain/Vegetarian diet. I like working out occasionally and play badminton and volley ball. Ambitious in life.

I prefer educated, independent and happy girl. Enjoying music or movies or video games, is a plus. Should be willing to live a fit lifestyle.
